ONE COMPANY, TWO BRANDS, MANY POSSIBILITIES.

Since 1980 Hüco has been recognized for highest quality and performance. As a result of the development of numerous innovative products in the last few years the company has become a well-known supplier in the aftermarket. Through the acquisition of Hüco by Hitachi Automotive Systems this development was consistently continued in 2012.

Today Hitachi Automotive Systems is one of the global players in the Independent Automotive Aftermarket. Hitachi Automotive Systems Espelkamp GmbH brings together the flexibility and dynamics of a medium-sized company with the strengths of belonging to a global corporation. This enables us to react promptly to the demands of the market, to meet the wishes of our customers and then integrate them into our products and services. Furthermore, based on our two-brand strategy we are able to offer our customers an additional wide range of original spare parts.

Production of our products at numerous certified locations around the globe.

Benefit from our two-brand strategy.

OUR PRODUCTS — MORE THAN JUST A REPLACEMENT.

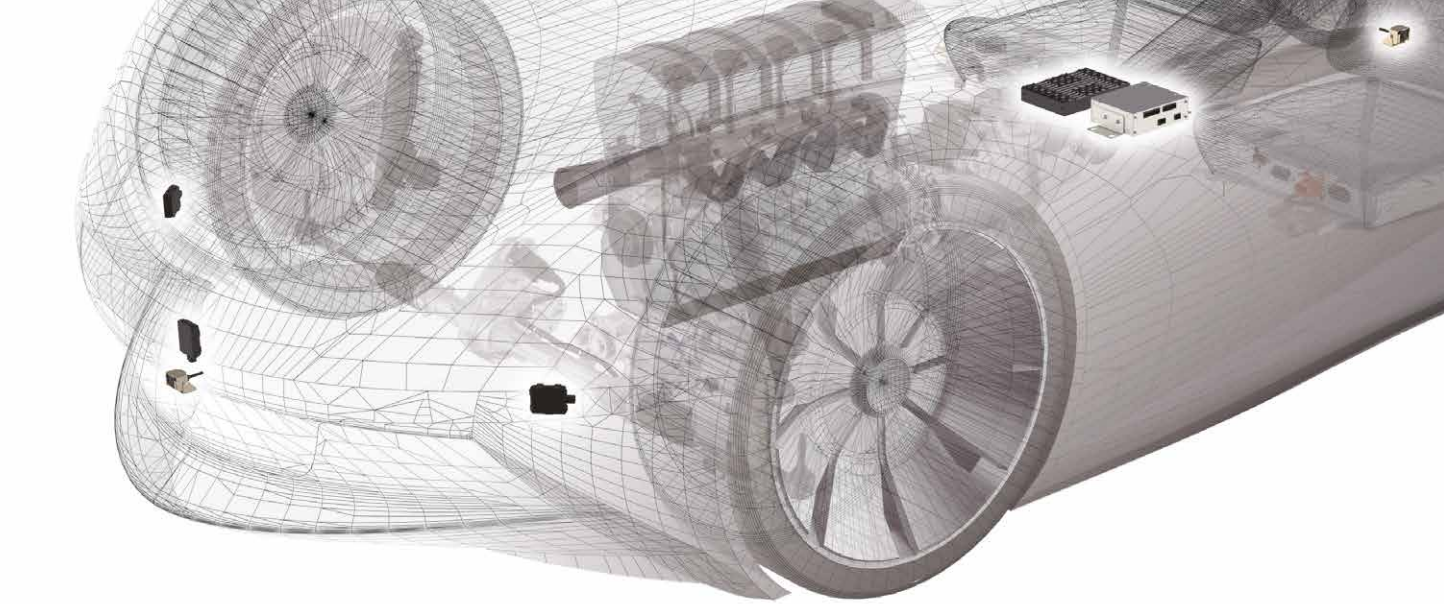

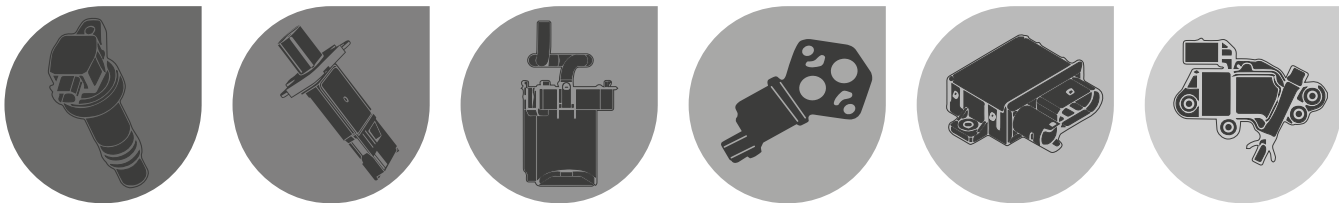

Hitachi Automotive Systems Espelkamp GmbH combines two successful brands – Hitachi and Hüco - which have an unsurpassed variety of products.

We believe in a mobile future and have taken up the challenge of actively shaping the developments of the international aftermarket.

As a highly innovative company, we always observe the ever-changing requirements of the Aftermarket in order to remain a strong partner for our customers also in the future. Today, our steadily growing product portfolio comprises a wide variety of products from the areas of ignition, sensors, fuel systems, valves/probes, relays and electronics.

We live quality - 5 years warranty on our Hüco brand products.

You'll find our current product range on TecDoc.

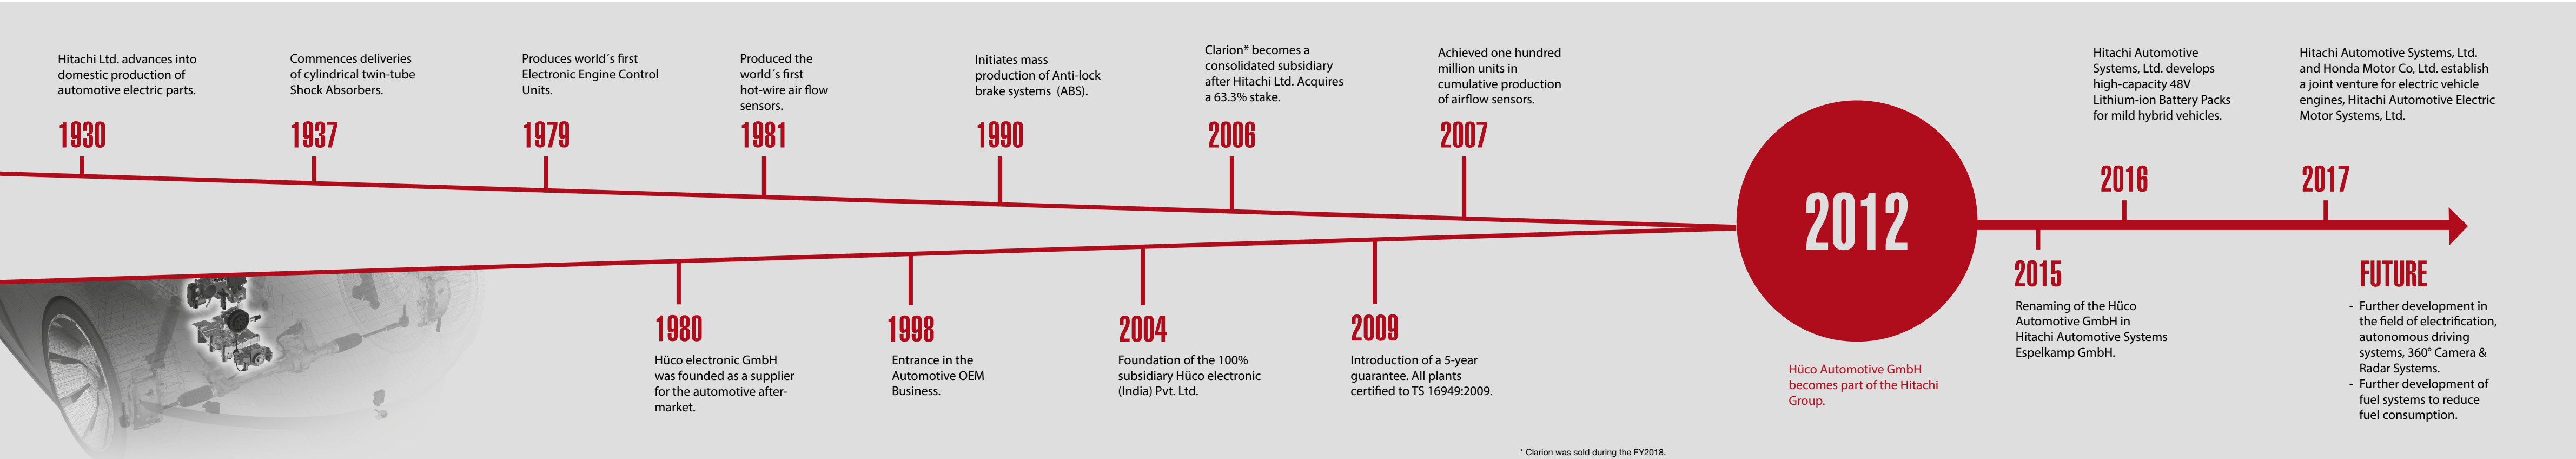

YOUR STRONG PARTNER FOR THE FUTURE.

Automotive connectivity will fundamentally change the way we travel. Through access to Big Data and with the help of artificial intelligence, new types and volumes of information can be stored and processed. In order to significantly advance the development in these areas we use our strengths in electronics as a basis for the further development of our product and system technologies in the areas of environment and safety. This is how we create new values for mankind and society.

We create connected values. Today, tomorrow and in the future.

Are you ready for the future? We are.

YOUR STRONG PARTNER IN ALL ASPECTS.
