

# LED DAYTIME RUNNING LIGHT

with side light function

- ▶ Increased safety
- ▶ Small installation dimensions
- ▶ Cool design
- ▶ Fully automatic activation
- ▶ Does not require TÜV approval
- ▶ ECE R87 homologated

Around half of all traffic collisions occur because other road users are “not seen”. Since this risk can be directly minimised with activated illumination, the Daytime Running Light Law already currently exists in many European countries. Following the European Commission’s decision, this law shall generally apply as of 2011 for all new car models.

By using the LED daytime running light from Trifa, you are sending a clear signal. The bright, whitish light provides a noticeable increase in safety and additionally makes your car a real eye-catcher. A total of five powerful LEDs per light give you a maximum light panel size and switch on/off automatically.

The universal LED daytime running light from Trifa is energy-saving and long-lasting, providing you with maximum efficiency as well as increased safety.

**More light for more safety and design – with the LED daytime running light from Trifa.**

GERMANY

# LED daytime running light

with side light function

- ▶ Low energy consumption
- ▶ Long service life
- ▶ Universal use
- ▶ Large light panel with the smallest installation dimensions

## Scope of delivery:

- 2 daytime running lights
- Cable set
- Mounting bracket
- Screws

## An additional safety advantage

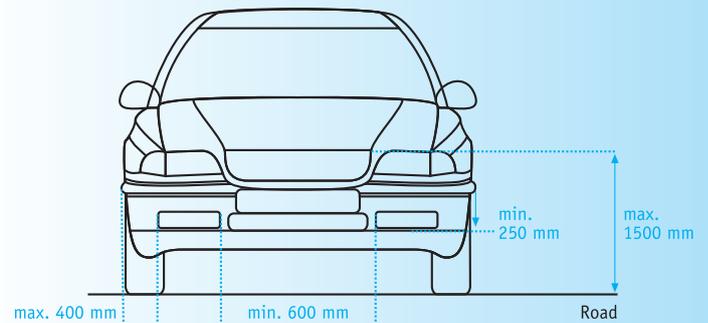

When the dimmed headlights are switched on, the rear light usually also comes on. The brake lights are therefore less noticeable during the day and are not seen so easily by other road users. The Trifa LED daytime running light averts this effect by automatically switching itself off when you turn on the dimmed headlights.

Art. no. 15140

## Installation dimensions in mm:

220 (B) x 27 (H) x 49 (D)

ECE R87 (E4)

RL (E11)

TÜV-approved
